  - 7.8 CGPA

## TECHNICAL SKILLS

Programming Languages      PHP, HTML, HTML5, CSS, JavaScript

Database      MySQL

## ACADEMIC PROJECT

Title: - Blood Bank Management System

Description: - The project consists of a central repository containing various blood deposits available along with associated details. These details include blood type, storage area, and date of storage. These details help in maintaining and monitoring the blood deposits. The project is an online system that allows to check whether required blood deposits of a particular group are available in the blood bank. Moreover, the system also has added features such as patient names and contacts, blood booking, and even the need for certain blood groups to be posted on the website to find available donors for a blood emergency. This online system is developed on a PHP platform and supported by a MySQL database to store blood and user-specific details.
